

## **\*Effective 10/1** **Attestation Process & Requirements Update**

Dear Transportation Provider,

To ensure trip validations are in compliance with LDH requirements, [National MedTrans](#) is updating the attestation process effective **10/1/18**. Transportation Logs will be required with the attestation of every trip. Trips (claims) without a valid Transportation Log will be denied.

Previously provided Transportation Logs must be completed accurately with driver/member signatures to complete trip attestation and initiate the payment process.

All providers need to learn this new process and understand the steps required to complete and upload the transportation log. The MedTrans Provider Relations Department will contact between you 9/15 and 9/30 to ensure your staff is trained appropriately.

If you have any questions, please contact your Provider Relations Team.

Sincerely,

Provider Relations Team
